

SI-30 total

30-Year Solar & Battery Warranty

Triple the warranty of your costliest component.

Homeowners with solar and battery storage will enjoy peace of mind with **SI-30 Total**, covering both solar and battery systems for 30 years. SI-30 Total triples the protection for the most costly component of your solar energy system—the battery—ensuring your investment is sound.

Unmatched Coverage

Most manufacturer warranties last 10-12 years and cover up to 70% retention at the end of their term, often with cycle limits.

Optimize Performance

With linear degradation, by year 17, the battery component will likely need replacement as it would fall below 50%.

Investment Protection

The SI-30 Total warranty covers the cost of a new battery, typically over \$10,000, ensuring your solar investment stays cost-effective and worry-free.

Expert Servicing

Batteries require servicing by licensed electricians, the priciest professionals on a job site. SI-30 Total ensures coverage for these complex, time-intensive repairs.

Reliable Support

If you have any issues, we connect you with providers familiar with your battery system, ensuring expert and reliable service.
